

Melbourne Energy Institute

MEI Symposium 21

The MEI Symposium 21 is a full day conference seminar showcasing the University of Melbourne's multi-disciplinary energy research across the Melbourne Energy Institute's four technical programs.

The MEI Symposium 21 event will provide a space for collaboration between the sector and the University, as well as an opportunity to celebrate the past year's accomplishments. The Symposium features international and local keynote speakers, talented graduate students, and research staff presenting their research on important energy topics within MEI's four program areas, including Energy Systems, Power Generation and Transport, Hydrogen and Clean Fuels, and Energy Materials.

Date:	Friday 3rd D	ecember 2021	Time:	8:30am – 4:45pm
Where:	Hybrid seminar (Face to face and online)		Contact:	mei-info@unimelb.edu.au
Venue:	Melbourne Connect, The Forum, 1 st Floor, 700 Swanston Street, Melbourne			
Registration:	In person:	Attend in person		
	Online:	Use links in respective program	sessions	

PROGRAM

Time	Location: Forum 1 Melbourne Connect, 1 st floor, 700 Swanston Street, Melbourne Zoom registration: <u>http://go.unimelb.edu.au/js7i</u> ONLINE = presenters located interstate / overseas
	Plenary
8:30am – 8:35am	Welcome and opening of the MEI Symposium Prof. Mark Hargreaves, Pro Vice-Chancellor (Research Partnerships and Infrastructure)
8:35am – 8:40am	Introduction of the Plenary Speaker Prof. Michael Brear, Director, Melbourne Energy Institute
8.40am – 9.35am	Opening Plenary Ms Anna Collyer, Chair, Australian Energy Market Commission

	Stream 1 (am)	Stream 2 (am)
	Energy Systems Research Program	Energy Materials Research Program
Time	Chair: Prof Pierluigi Mancarella	Chair: Dr. Wallace Wong
	(Program Leader)	(Program Leader)
	Room: Forum 1 Zeem registration: http://ge.unimolh.edu.eu/ieZi	Room: Forum 3
	Kovroto:	Kovroto:
	Keynote: Mr Ross Baldick ONLINE	Reynote: Professor Kylie Catchnole
	Professor Emeritus, Department of Electrical and	Professor in the School of Engineering,
9:40am – 10:30am	Computer Engineering, The University of Texas	Australian National University
	Texas power grid under extreme weather	High efficiency perovskite/silicon tandems
	in February 2021	for electricity and hydrogen
10:30am – 10:50am	BR	EAK
	Extracting the physics of electrical networks	Extending the lifetime of high temperature
10.F0.cm 11.20.cm	using smart meter data: towards model-free	batteries for use in venus landers
10:50am – 11:20am	voltage calculations	Dr Dean Glass
	Mr Vincenzo Bassi ONLINE	
	Electric vehicle charging preferences of	Photochemical upconversion below silicon
11:20am – 11:50am	Australian consumers	bandgap in oxygen mediated environment
44.50	Dr Patricia Lavieri	Dr Elham Gholizaden
11:50pm – 12:20pm	integrated electricity-gas-nydrogen systems	deliver cheaper power by minimizing solar
	Mr Isam Saedi	panel losses
		Dr Calvin Lee
	The role of energy storage on enhancing RES-	Titanium oxide based carrier selective contacts
12,20nm 12,50nm	dominated system reliability and resilience	for the next generation of crystalline silicon
12:20pm – 12:50pm	Mr Guanchi Liu	solar cells
		Mr Jesús Ibarra
12:50pm – 1:30pm	LUNCH	I BREAK
12:50pm – 1:30pm	LUNC Stream 1 (pm)	H BREAK Stream 2 (pm)
