

Paving the way to Australia's net-zero future

Melbourne Energy Institute
Presenter: Daniel Westerman, CEO AEMO

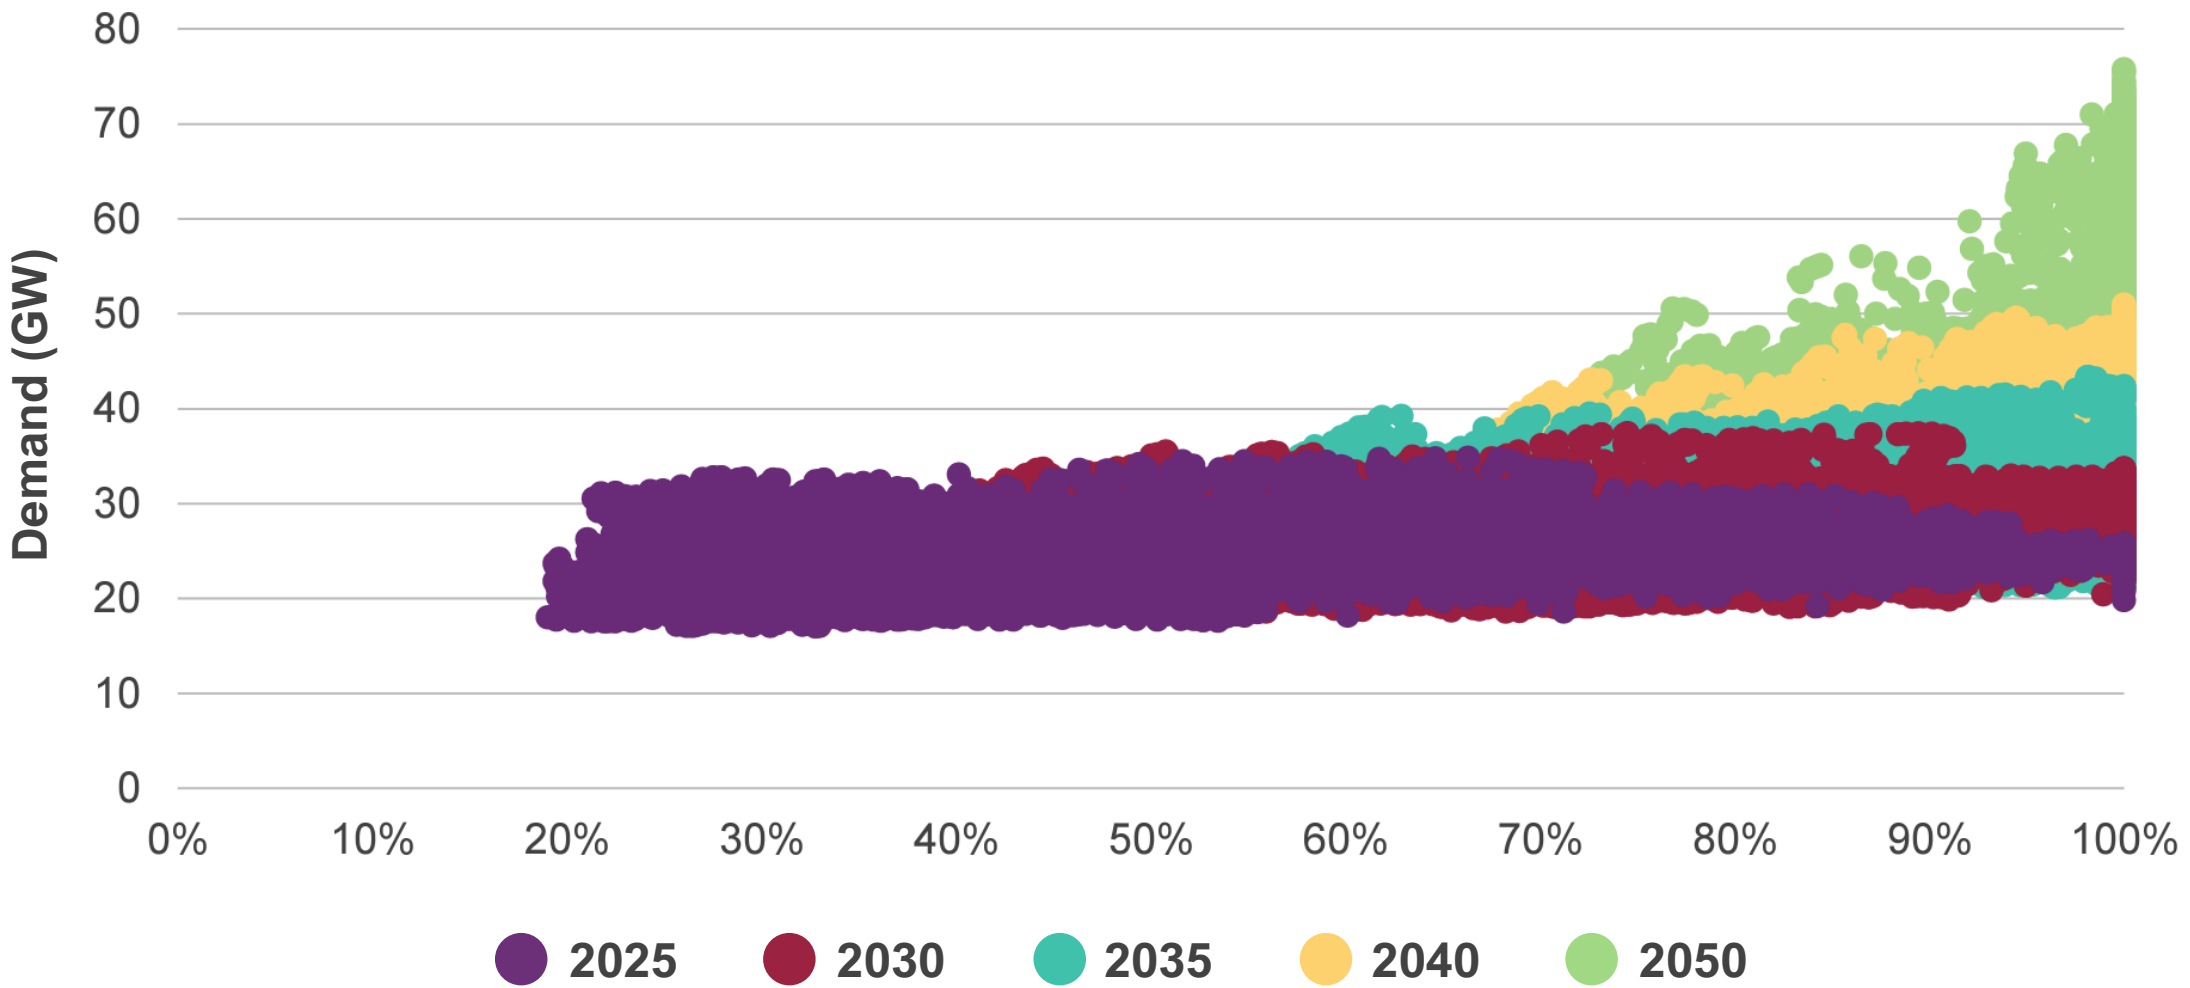

9 December 2022

Projects supporting the Integrated System Plan

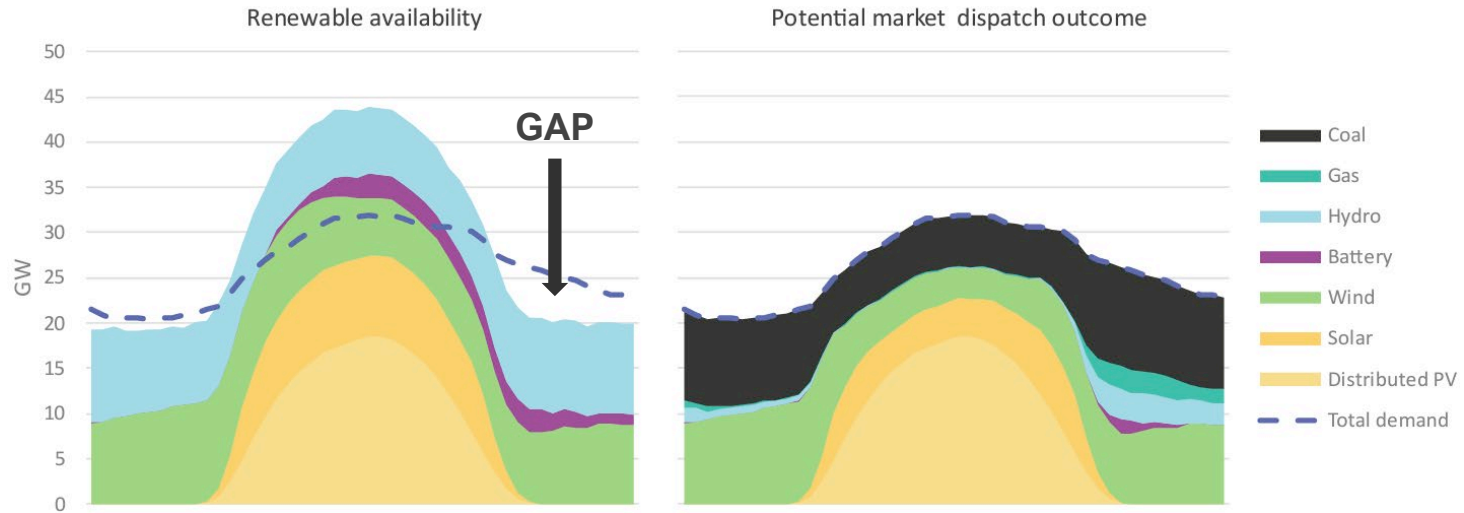

Renewable resource potential

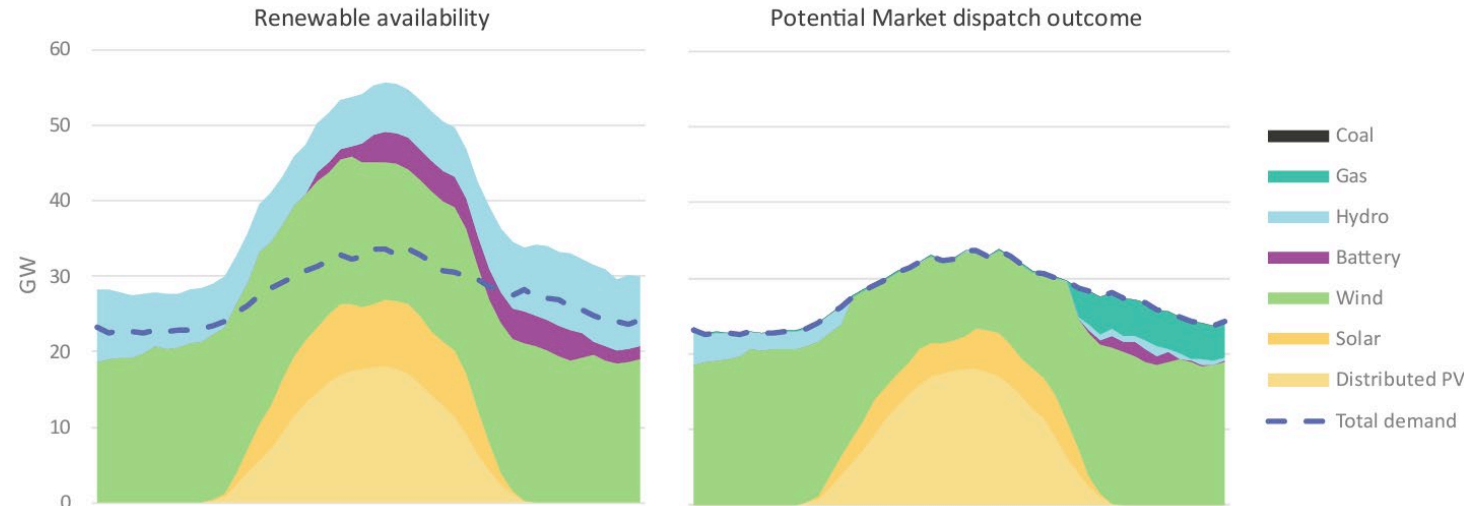

Towards 100% renewable dispatch

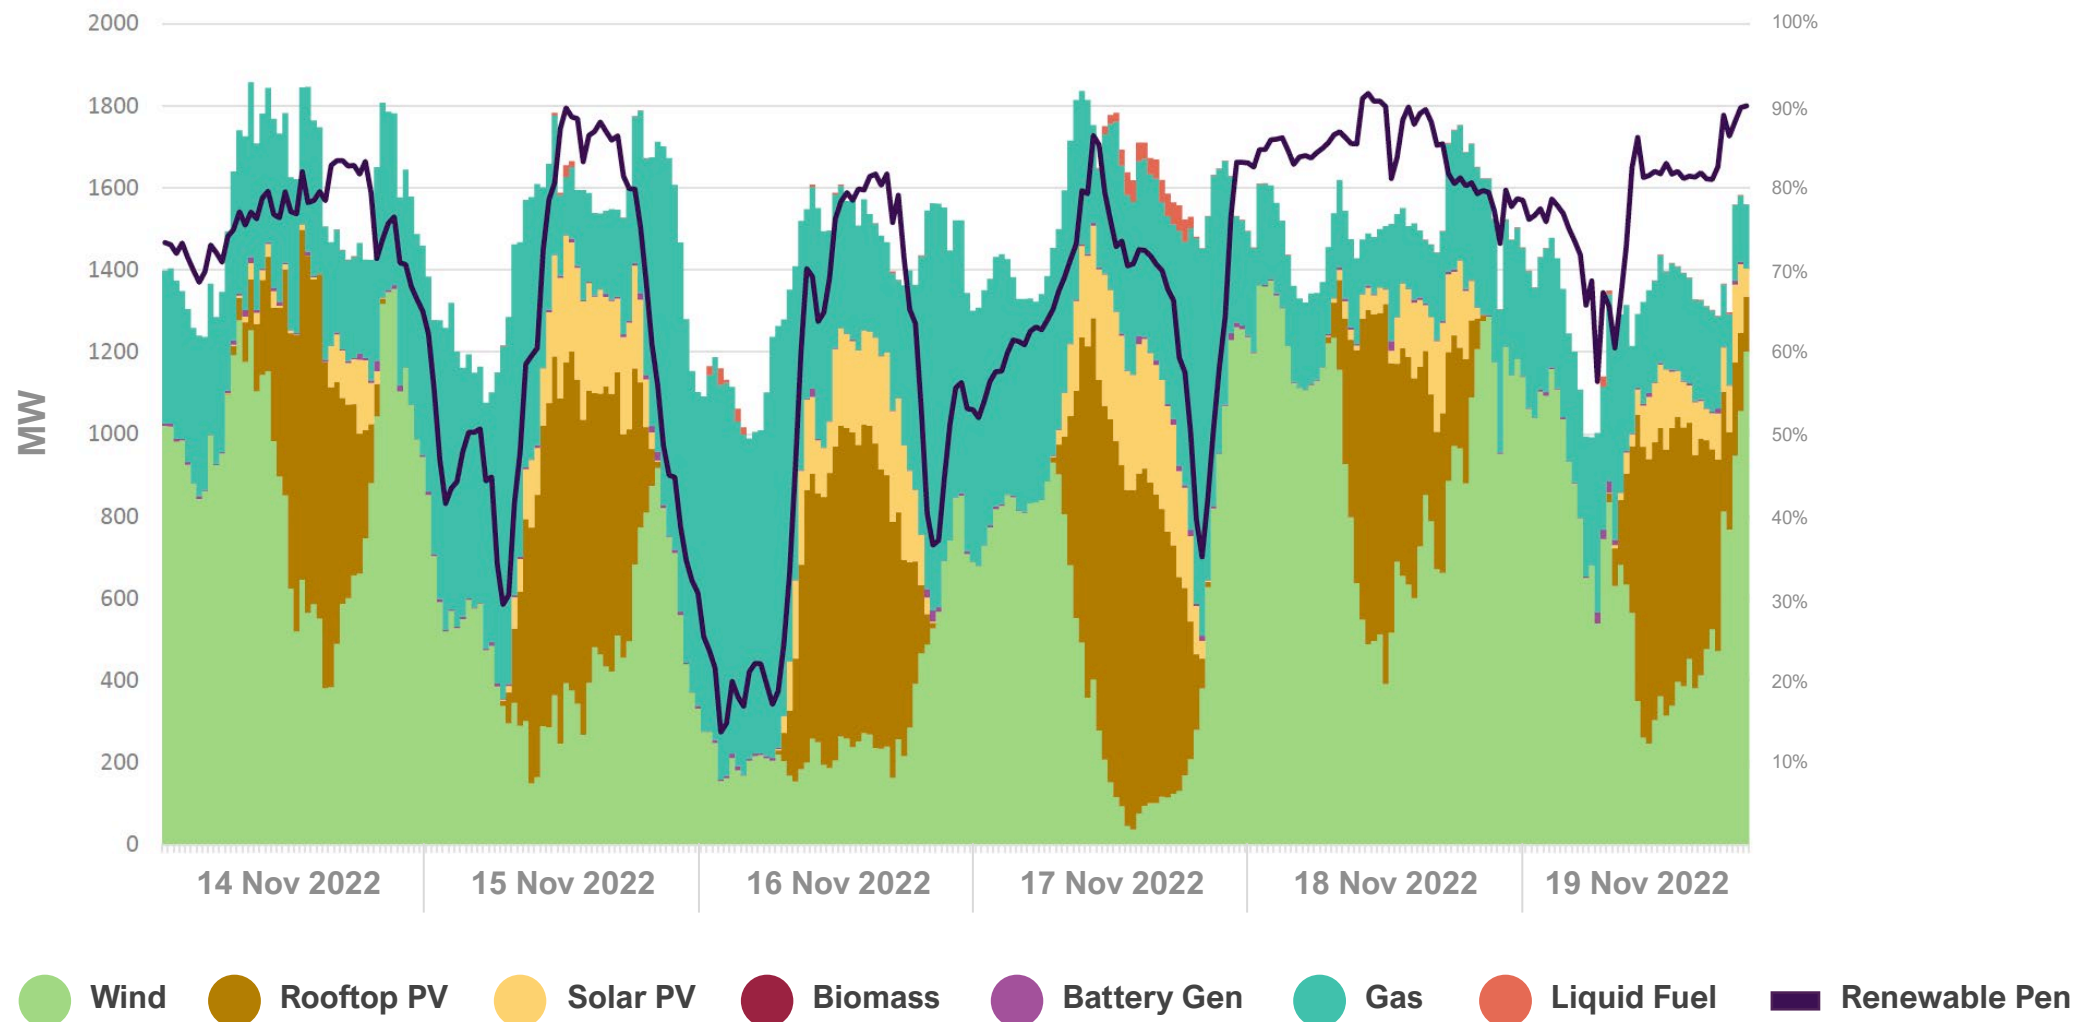

Coal required to meet demand

Coal not required to meet demand

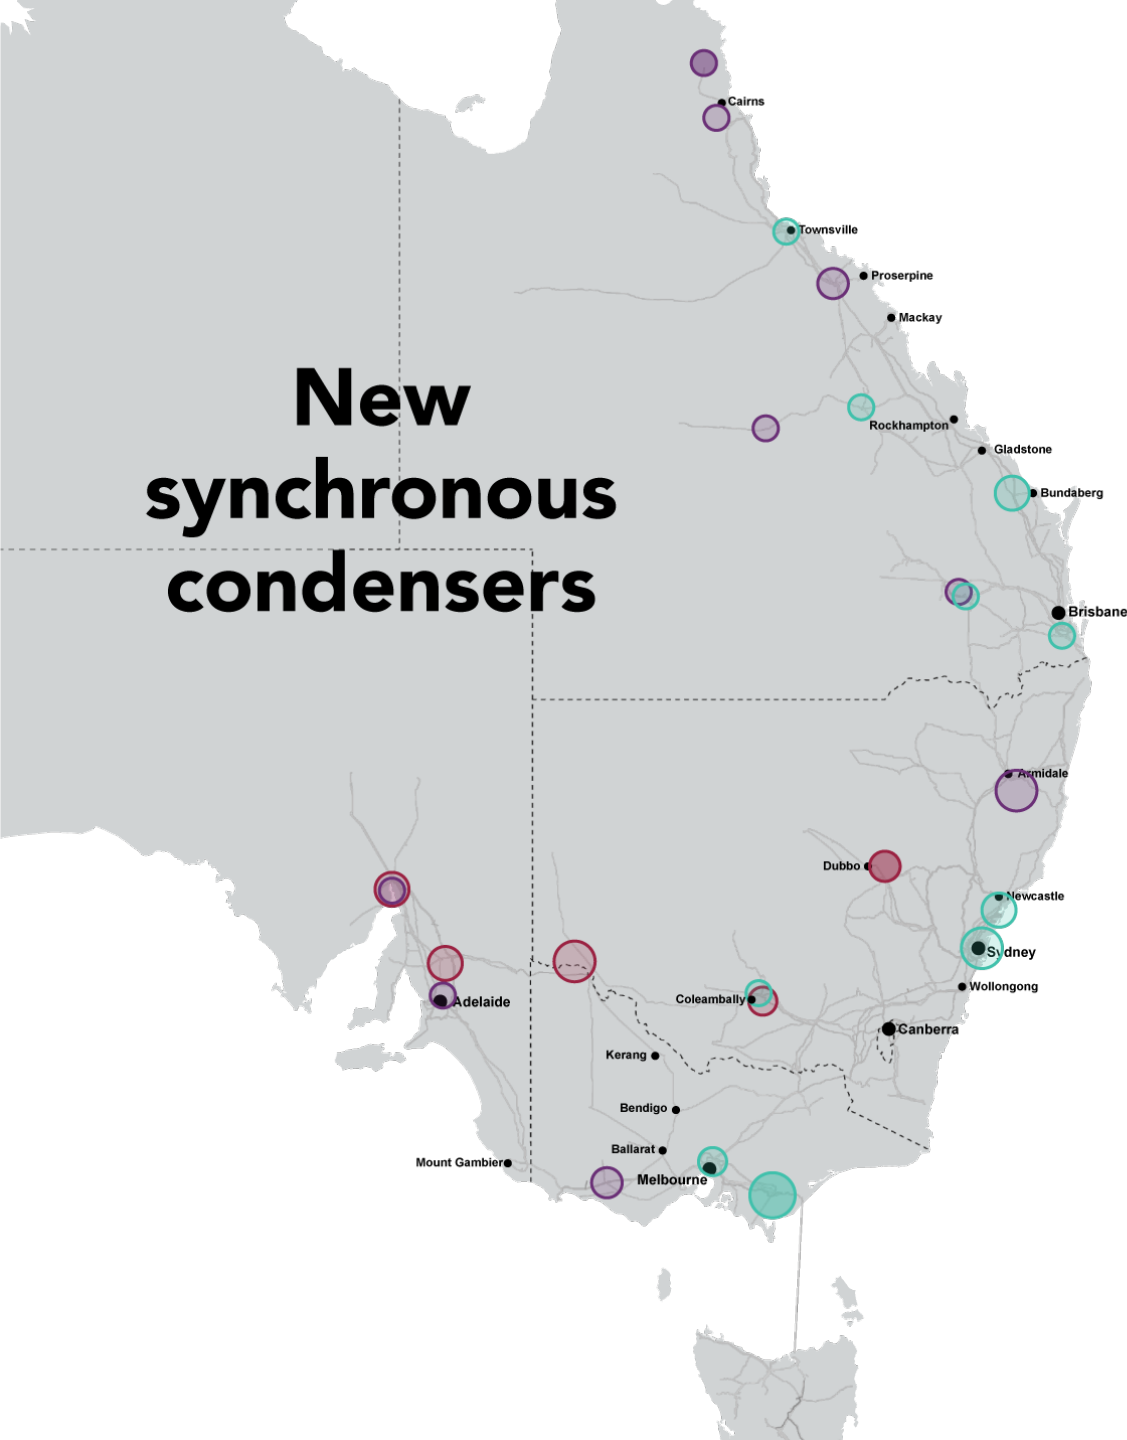

SA renewable penetration as an island

Initial study of security services

100% renewable penetration at minimum demand

New synchronous condensers

Legend: New synchronous condensers

-  Minimum fault level requirements
-  Efficient level of system strength
-  Existing or expected synchronous condensers

OPERATIONS
